

Blackwater Mine

December 22, 2023

Dear Sir or Madam:

RE: Commencement of Transmission Line Construction and Activity in Your Area

Further to our letter on August 15th, 2023, we are providing notification that construction of the Blackwater Mine transmission line has now commenced. We would also like to provide you with an update based on our current schedule.

We anticipate clearing will progress within your tenure area between the months of December to March.

It is anticipated that crews will be working 7 days per week from 6 am to 6 pm, including stat holidays and weekends.

As communicated in our August 15th letter, overall activities during the construction phase will include: logging and clearing, access trail development, the re-establishment of roads, pole installation, conductor and fibre stringing, electrification, and implementation of access control measures. At this time, no road closures are planned during TL construction. Construction is expected to be completed in the fall of 2024.

For additional information regarding TL construction activities, information on the TL management plans and mitigation measures, and other additional documentation, please visit: <https://blackwatergoldmine.com/> and sign up for email notifications to be made aware of new website content or updates to project materials such as schedules and work plans.

Please note: clearing and construction schedules are subject to change. If there are any modifications to the schedule or the activities in your area, we will reach out to provide you with an update.

Feel free to email office.blackwater@artemisgoldinc.com or phone 250-567-3276 if you have any questions or require any further information.

Yours truly,

Val Erickson
